

Outline

A frame with `orgframe` sample code

```
\begin{orgframe}
  Here is a beamer frame.
\end{orgframe}
```

This is exported in a `frame` environment, although it is marked as fragile.

A frame with frame sample code

```
\begin{frame}
  Here is a beamer frame.
\end{frame}
```

This is exported in an `orgframe` environment, since contains `\begin{frame}` and `\end{frame}`.

An ordinary frame

$$z^n = x^n + y^n$$

This is exported in a `frame` environment.
