

test

February 1, 2014

## src block

- ▶ Only spaces here, but tabs will appear in .tex

```
a <- "Test of whitespace preservation"
```

```
b <- cat("Let's see what happens when we spill",  
"onto multiple lines but want the text",  
"being passed to cat() to be aligned")
```

## example block

- ▶ Only spaces here, which will be unchanged in .tex

```
a <- "Test of whitespace preservation"
```

```
b <- cat("Let's see what happens when we spill",  
        "onto multiple lines but want the text",  
        "being passed to cat() to be aligned")
```

## src block

- ▶ Idea to play with less spaces (< 5)

```
a <- "Test of whitespace preservation"
```

```
b <- cat("Let's see what happens when we spill",  
        "onto multiple lines but want the text",  
        "being passed to cat() to be aligned")
```

## example block

```
a <- "Test of whitespace preservation"

b <- cat("Let's see what happens when we spill",
        "onto multiple lines but want the text",
        "being passed to cat() to be aligned")
```
