7. About Quotes

Great clouds overhead
Tiny black birds rise and fall
Snow covers Emacs

-- AlexSchroeder

Everything should be made as simple as possible, but not any simpler -- Albert Einstein

8. About Literal Examples

You can include literal examples that should not be subjected to markup. Such examples will be typeset in monospace, so this is well suited for source code and similar examples.

```
Some example from a text file.  
The following line should not be regarded as the  
continuation of a long footnote:  
\par This is NOT part of a footnote.
```

For simplicity when using small examples, you can also start the example lines with a colon followed by a space. There may also be additional whitespace before the colon:

Here is an example

```
Some example from a text file.  
Some example from a text file.
```

9. About Drawers

12. Random Pieces

12.1. Lord of the Rings

My favorite scenes are (in this order)

1. The attack of the Rohirrim
2. Eowyn's fight with the witch king
 - this was already my favorite scene in the book
 - I really like Miranda Otto.
3. Peter Jackson being shot by Legolas
 - on DVD only

He makes a really funny face when it happens.

But in the end, no individual scenes matter but the film as a whole. Important actors in this film are:

Elijah Wood He plays Frodo

Sean Austin He plays Sam, Frodo's friend. I still remember him very well from his role as Mikey Walsh in the Goonies.
