1 problem with \LaTeX export

The following verbatim output was generated using babel and maxima.

```
\hyperref[sec-1]{n1n = 0.93 mol, n1i = 0.05 mol, n1h = 0.02 mol, n2n = 0.558 mol, :
```

The two lines above are converted into a single line in the latex output **and** the line starts with `\hyperref`.
